NOTES TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL INFORMATION

30 June 2014 (Unaudited)

9 Interest rate swaps and forward foreign exchange contracts

Interest rate swaps and forward foreign exchange contracts are financial instruments that derive their value by referring to interest rates and foreign exchange rates respectively. Notional principal amounts merely represent amounts to which a rate or price is applied to determine the amounts of cash flows to be exchanged and do not represent the potential gain or loss associated with the market or credit risk of such instruments.

The Group deals in interest rate swaps to manage its interest rate risk on interest bearing assets and liabilities. Similarly, the Group deals in forward foreign exchange contracts for customers and to manage its foreign currency positions and cash flows.

Interest rate swaps used to hedge the change in fair value of the Group's financial assets and liabilities and which qualify as effective hedging instruments are shown as interest rate swaps held as fair value hedges. Forward foreign exchange contracts are carried out for customers or used for hedging purpose but do not meet the qualifying criteria for hedge accounting. The risk exposures on account of interest rate swaps and forward foreign exchange contracts are covered by entering into similar transactions with counter parties or by other risk mitigating transactions.

The fair value of interest rate swaps and forward foreign exchange contracts included in the financial records, together with their notional amounts is summarised as follows:
