Snapshot

|-------------------------|--|
| Overview | <ul style="list-style-type: none"> The State of Kuwait ("Kuwait" or the "Sovereign") is a sovereign state on the coast of the Arabian Gulf, covering a total area of 17,818 square kilometers. Kuwait is a constitutional monarchy, headed by His Highness the Emir, Sheikh Sabah Al-Ahmad Al-Jaber Al-Sabah. |
| Economy | <ul style="list-style-type: none"> Kuwait enjoys an open economy, dominated by the government sector. Its economy, while primarily dependent on the oil industry, has witnessed an increasing contribution from non-oil sectors. Kuwait has one of the lowest industry breakeven oil prices globally, and the lowest fiscal breakeven in the GCC, making it more resilient to low oil prices. It has registered substantial fiscal and external surpluses over the years, which serve as a buffer. |
| Strategic Vision | <ul style="list-style-type: none"> Kuwait has launched a long-term policy vision under the banner of "Kuwait Vision 2035". The vision encompasses six strategic aims: increasing GDP growth, encouraging the private sector, supporting human and social development, promoting demographic policies, enhancing and improving the effectiveness of government administration, and consolidating the country's Islamic and Arab identity. Kuwait has set medium-term development strategies with a view to ultimately achieving this vision. |

Recent Developments

| | |
|-----------------------------|--|
| GDP Growth | <ul style="list-style-type: none"> Economic growth is seen improving despite the drop in oil prices, as project awards pick up. Fiscal and external buffers give Kuwait ample capacity to sustain spending plans. Non-oil growth is expected to accelerate slightly as capital spending on projects improves. Non-oil growth is expected to be around 3.5-4% in 2017 and 2018. |
| Public Finance | <ul style="list-style-type: none"> Fiscal deficits are expected to persist in the near-term given lower oil revenues, but should remain manageable given ample buffers. Inflation is expected to rise to around 3.0% in 2017 on subsidy reform; limited global inflation, and steady domestic pressures will be offset by higher utility tariffs; inflation is likely to ease once again in 2018. |
| Household Debt | <ul style="list-style-type: none"> Household debt growth has moderated notably in 2016, dropping below 8% for the first time in years. Kuwaiti employment remained healthy in 2016. Growth in government spending on wages and salaries is expected to moderate, but remain positive. |
| Credit Growth | <ul style="list-style-type: none"> Credit growth remained strong in 2016, as government project implementation boosted borrowing, though a one-time corporate debt repayment in Oct. 2016 brought the rate down. Growth has been on an uptrend since January and registered 4% y/y in Apr. We expect growth of 7-9% in 2017 and 2018. Government project awards have maintained a good pace and the pipeline of tenders remains strong. The government has indicated it will not cancel or delay any planned projects. |
| Real Estate Activity | <ul style="list-style-type: none"> Real estate activity seem to bottom out following cool down from a strong 2014; sales fell by 18% in the 12-months ending May 2017 to KD 2.2 billion. Property prices, which saw an orderly correction the last two years, appear to have bottomed the last 6-9 months. |
